Surface Preparation
& Tile Setting
Installation Products
As one of the most trusted and respected brands in the industry, TEC® installation systems deliver innovative solutions that provide valuable advantages to our partners in quality construction.

For over a half century, we have been delivering innovative products that overcome installation challenges to help you transform visions into reality, and blueprints into buildings.

At TEC®, our inspiration is you, our customers — the visionaries, the creators and the builders of great spaces. We continue to combine cutting-edge technology with real-world expertise to provide customer focused solutions that maximize efficiency, ease of use and value.

So go head, visualize, envision and dream. You’ll be amazed at your ability to imagine and achieve with TEC®.

Our Focus on the Environment

TEC® products, like all other H.B. Fuller Construction Products brands, are developed and manufactured with the environment in mind.

Our goal is simple: Develop products that balance sustainability, usability, performance and value. As you explore our product lines, you will notice that many items display our green leaf symbol, signifying a product is eco-friendly and provides environmental benefits.

TEC® is a proud partner of:
Surface Preparation

PREP FOR SUCCESS

Proper preparation of substrates is the foundation for success. The TEC® Surface Preparation line is designed to provide smooth, secure surfaces that are ready for floor installation. With a full line of products for virtually any type of installation, TEC® helps you handle your toughest surface preparation challenges.

- Patches and Patch Additives
- Primers
- Self Leveling Underlayments
- Crack Isolation and Waterproofing

800-832-9002   tecspecialty.com

**Patches and Patch Additives**

**VersaPatch® Latex Modified Floor Patch and Leveler**

**TA-327**

For patching voids and irregularities in wood, concrete and most existing floor materials.

- Patch ½” down to featheredge
- Non-shrinking, easy troweling, excellent coverage
- Fast-setting—install flooring in 30–45 minutes
- 4,200 psi compressive strength

Available in: Item Number:

| 9.75 lb. Pure Pak* | 33-1766-5311 |
| 25 lb. bag         | 33-1766-3011 |

**Fast-Set Deep Patch Underlayment**

**TA-305**

Designed for deep fills, ramping and leveling of concrete and plywood subfloors. For interior/exterior use.**

- Featheredge up to 1½” thick in a single application, up to 5” with proper aggregate
- Walkable hardness in 60 minutes, apply most floor coverings in 1–1½ hours
- Apply with steel trowel, float and/or screed
- 4,200 psi compressive strength

Available in: Item Number:

| 25 lb. bag         | 70-5689-3011 |

* Registered trademark of Excello Corporation

**Certain installation requirements apply. See TEC® product data sheets and technical data sheets for more information, proper installation of products and limitations.
PerfectFinish™ Skim Coat  
**TA-320**

High-performance skim coat for rough, irregular surfaces. Excellent as an embossing leveler.
- Featheredge to ½” thick
- Fast-setting—install flooring in 30–60 minutes
- Creamy spreading, super-smooth finish
- Self-drying technology
- Superior bond strength
- 3,600 psi compressive strength

*Available in:  
10 lb. bag  33-0386-5311

**Patch Additive**  
**TA-861**

Use as an admixture for TEC® PerfectFinish™, VersaPatch® and Fast-Set Deep Patch.
- For embossing, leveling and other applications
- Improves adhesive, bond and flexural strengths

*Available in:  
1 gallon bottle  33-1512-5011

**Primers**

**Multipurpose Primer**  
**TA-560**

Improves adhesion and bond strength of TEC® levelers to the sub floor. Also allows direct ceramic tile installation on many difficult-to-bond-to substrates such as metal, un-scarified glazed ceramic and gypsum underlayments.*
- One primer for all substrates
- Solvent-free
- Easy to use—apply with brush or roller

*Available in:  
1 gallon bottle  70-5008-5013
5 gallon pail  70-5008-1513

*Certain installation requirements apply. See TEC® product data sheets and technical data sheets for more information, proper installation of products and limitations.
Self Leveling Underlayments

EZ Level® Premium Self Leveling Underlayment

**TA-323**

Advanced performance, fast-setting self leveler. Fiber-reinforced. For featheredge up to 1½” in a single pour, or up to 5” with proper aggregate.

- Low shrinkage and crack resistant
- Fast-curing, walkable in 2–4 hours; install permeable coverings in 6 hours; non-permeable coverings in 12–16 hours
- Extended working times for maximum usability
- Pumpable, pourable, free-flowing
- Can be used over green concrete (<95% RH)
- 5,000 psi compressive strength

Available in: Item Number:
50 lb. bag 33-0387-3111

Smooth Start™ Standard Self Leveling Underlayment

**TA-318**

Standard, fast-setting self leveler. For featheredge up to 1” in a single pour, or up to 5” with proper aggregate.

- Low shrinkage
- Cures quickly, walkable in 2–4 hours; install most flooring after 24-48 hours; ceramic tile installation after 12–16 hours
- Extended working times for maximum usability
- Pumpable, pourable, free-flowing
- Can be used over green concrete (<95% RH)
- 4,000 psi compressive strength

Available in: Item Number:
50 lb. bag 33-0559-3111
Contractor Grade Self Leveling Underlayment

TA-567

- Superior flow properties
- Use directly over green concrete (<95% RH) — Cures to a smooth, consistent finish
- Thickness ranges from $\frac{1}{16}''$ up to 1'' depth in a single pour

Available in:  Item Number:
50 lb. bag  70-6209-3111

Ultra Wear Surface

TA-563 (Gray) / 564 (White)

Dual purpose, self leveling and interior wear surface. Accepts topical or integral colorants.

- Fiber reinforced, low shrinkage
- Super-fast curing — walkable in 2-4 hours; install permeable coverings in 6 hours; non-permeable coverings in 12-24 hours
- Pumpable, pourable, free-flowing
- From $\frac{1}{16}''$–1½'' depth in a single pour
- Can be used over green concrete (<95% RH)
- 6,000 psi compressive strength

Available in:  Item Number:
50 lb. bag  70-5208-3113 Gray
50 lb. bag  70-5321-3113 White

Fiber-Reinforced Underlayment

TA-565

Extreme-performance, triple-fiber reinforced self leveler. Can be used over single-layer wood subfloor*. Recommended for use with radiant heating systems.*

- Triple-fiber reinforced, extremely low shrinkage
- Super-fast curing — walkable in 2–4 hours, install flooring in 6 hours
- From $\frac{1}{16}''$–1½'' depth in a single pour
- Can be used over green concrete (<95% RH)
- 6,000 psi compressive strength

Available in:  Item Number:
50 lb. bag  70-5225-3113

*Certain installation requirements apply. See TEC® product data sheets and technical data sheets for more information, proper installation of products and limitations.
Crack Isolation and Waterproofing

HydraFlex™ Waterproofing Crack Isolation Membrane

**TA-316**

Ready-to-use, flexible, mold and mildew resistant waterproofing crack isolation membrane for interior and exterior applications. Forms a smooth, monolithic, watertight surface over walls, floors and ceilings. HydraFlex™ Membrane stops in-plane cracks up to ¼" wide at the subfloor from telegraphing through to ceramic and stone tile. For residential to extra heavy commercial applications.

- Exceeds ANSI A118.10 Specifications for Waterproof Membranes
- Exceeds ANSI A118.12 Specifications for Crack Isolation Membranes
- Use for Positive Hydrostatic Pressure Applications
- Fast Drying – ready for tile installation in 2 to 3 hours
- Easy roller, trowel or spray application
- No mesh required (except for waterproofing installations at changes in-plane and substrate joints)
- Apply over new (green) concrete as little as 3 days old
- Isolates cracks up to ¼"
- Resists mold and mildew growth
- IAPMO approved

**Available in:**

Product contains low VOC.

HydraFlex™ Waterproofing Crack Isolation Membrane

TEC® Fiber-Reinforced Underlayment
Roll-On Crack Isolation Membrane (ROCI)
TA-317
Ready-to-use, flexible, mold and mildew resistant crack isolation membrane. Forms a uniform surface over approved substrates to prevent in-plane cracks up to ½” wide at the subfloor from telegraphing through the tile or stone. For residential to extra heavy commercial applications. For interior or exterior use.

- Meets ANSI A118.12 Specifications for Crack Isolation Membranes
- Isolates ½” in-plane movement of cracks and contraction (control) joints
- Apply over new (green) concrete as little as 3 days old
- Easy roller, trowel or spray application
- Fast drying – ready for tile installation in as little as 2 to 3 hours
- Built-in anti-microbial technology resists mold – providing a zone of inhibition when tested in accordance with ASTM D-5590
- No mesh required

Available in:       Item Number:
1 gallon pail      70-0770-5011
5 gallon pail      70-0770-1511

Triple Flex™ Waterproofing Crack Isolation Membrane
TA-324
Three uses in one product. Elastomeric cementitious system for waterproofing and crack isolation up to ½” wide prior to the installation of ceramic tile or stone. Will not transfer cracks through tile or stone when subjected to horizontal movement of cracks up to ½”. May also be used as a flexible bonding mortar. For interior and exterior use.

- Meets ANSI A118.10 Specifications for Waterproof Membranes
- Exceeds ANSI A118.12 Specifications for Crack Isolation
- Can also be used as a flexible bonding mortar to set tile up to 12” X 12”
- For larger tile or light colored marble, use Triple Flex™ as a crack isolation membrane first
- IAPMO approved

Available in:       Item Number:
5 gallon kit        33-1501-1511
2 gallon pail (Pt. A) 33-1501-1011
22.5 lb bag (Pt. B)  33-1758-3211
6” x 50’ mesh (Pt. C) 33-1759-9011
50 gallon drum (Pt. A) 33-1501-0111*

* Available on a Made to Order basis only.
Waterproofing Mesh

- For waterproofing installations at changes in-plane and substrate joints

Waterproofing and Crack Prevention Membrane

**TA-418**

TEC® Waterproofing and Crack Prevention Membrane forms a smooth, monolithic watertight surface over walls, floors and ceilings. TEC® Waterproofing and Crack Prevention Membrane stops in-plane cracks up to ¼” wide at the subfloor from telegraphing through to ceramic and stone tile. Use for residential to extra heavy commercial applications. Exceeds ANSI A118.10 Specifications for Waterproofing and ANSI A118.12 Specifications for Crack Isolation Membranes.

- Protects from water intrusion and tile cracking
- Easy roller or trowel application
- Ready-to-use
- Membrane resistant to growth of mold and mildew
- Interior/exterior
- IAPMO approved

Polymer-Modified Crack Isolation Mortars

1Flex® ¼" Crack Isolation Mortar
TA-333 / 334
Tile setting mortar that also functions as a ¼" crack isolation membrane. Also designed for the installation of tile directly over plywood/OSB with joist spacing up to 24" o.c. as part of the TEC® Single Layer Floor System. For use over plywood, cementitious surfaces and other substrates.
- One-step crack isolation and tile setting
- Superior bond strength
- Isolates horizontal movement of cracks up to ¼"
- Exceeds ANSI A118.4 and A118.11 shear bond specifications
- Provides 50 lbs. of coverage in a 35 lb. bag

Available in: Item Number:
35 lb. bag 33-0627-3411 Gray
35 lb. bag 33-0689-3411 White

Waterproofing Mesh
- For waterproofing installations at changes in-plane and substrate joints
- Use with HydraFlex® Waterproofing Crack Isolation Membrane or TripleFlex™ Waterproofing Crack Isolation Membrane

Available in: Item Number:
50' roll 33-1759-9011

IsoLight™ Lightweight ⅛" Crack Isolation Mortar
TA-358 / 359
A lightweight mortar that protects tile from up to ⅛" substrate cracking from in-plane horizontal substrate movement. For use over plywood, cementitious surfaces and other substrates.
- Formulated with Easy Trowel Technology™ for superior handling
- Extended open time for improved speed and productivity
- Exceeds ANSI A118.4 and A118.11 shear bond specifications
- Provides 50 lbs. of coverage in a 30 lb. bag
- Recommended for use with glass tile

Available in: Item Number:
30 lb. bag 70-4936-3611 Gray
30 lb. bag 70-4969-3611 White

Mortars & Additives
Polymer-Modified Fast Set Mortars

1Flex® Fast Set Accelerated ¼" Crack Isolation Mortar
TA-332

Fast-setting mortar that also functions as a ¼" crack isolation membrane. Also designed for the installation of tile directly over plywood/OSB with joist spacing up to 24" o.c. as part of the TEC® Single Layer Floor System. For use over plywood, cementitious surfaces and other substrates.

- One-step crack isolation and tile setting
- Ready to grout in 4 hours
- Superior bond strength
- Isolates horizontal movement of cracks up to ¼"
- Exceeds ANSI A118.4 and A118.11 shear bond specifications
- Provides 50 lbs. of coverage in a 35 lb. bag

Available in: Item Number:
35 lb. bag 70-0562-3411 White*

* Available on a Made to Order basis only.

Fast Set 3N1® Performance Mortar
TA-517 / 518

A fast set, lightweight premium mortar that combines polymer-modified, medium bed and non-sag features into one high-performance mortar. For use over plywood, cementitious surfaces and other substrates.

- Best for heavy and large format tile
- Ready for grouting in 3–4 hours
- Non-slip for large tile and stone wall applications
- Non-slump for heavy tile and stone floor applications
- Extended open time for maximum adjustability
- Formulated with Easy Trowel Technology™ for superior handling
- Exceeds ANSI A118.4 and A118.11 shear bond specifications
- Provides 50 lbs. of coverage in a 30 lb. bag
- Mold and mildew resistant

Available in: Item Number:
30 lb. bag 70-4574-3611 Gray*
30 lb. bag 70-4575-3611 White*

* Available on a Made to Order basis only.
**Fast Set Ultimate Large Tile Mortar**
**TA-386 / 387**
A fast-setting, high-performance, full-contact (full coverage) mortar for installing ceramic, porcelain and natural stone tile. It is ideal for use as a medium bed mortar for heavy and large format tile (maximum mortar thickness of ¾" after tile is embedded).
- Also used in standard thin set applications
- As a medium bed mortar, no back-buttering is needed
- Provides extended open time
- Non-sag/non-slump characteristics for wall and floor applications

**Fast Set Mortar**
**TA-395**
TEC® Fast Set Mortar is an accelerated polymer-modified thin set mortar that exceeds ANSI A118.4 and A118.11. Use for installing ceramic and natural stone tiles including mosaics, slate and porcelain on walls or floors interior and exterior.
- Cure only 3 hours before grouting
- Excellent for ceramic, porcelain and natural stone
- Mix with water – no additive needed

Polymer-Modified Mortars

Super Flex™ Ultra-Premium Thin Set Mortar
TA-392 / 393
An ultra-premium mortar with patented bonding formula that provides unparalleled bond strength over plywood, cementitious surfaces and other substrates.

- Unsurpassed bonding strength with virtually any tile or substrate combination
- Best for bonding glass and porcelain tile
- Exceeds ANSI A118.4 and A118.11 shear bond specifications

Ultimate Large Tile Mortar
TA-382 / 383
A high performance polymer-modified mortar ideal for installing large format and heavy tile over plywood, cementitious surfaces and other substrates.

- Non-slip and non-slump for large, heavy tiles on walls and floors
- Superior mortar transfer to tile
- Exceeds ANSI A118.4 and A118.11 shear bond specifications
- Smooth, creamy consistency
- Can be used for thinset or medium bed applications

**Medium Bed Mortar**  
**TA-372 / 373**

An entry-level, medium bed mortar for applications over cementitious surfaces and other substrates.

- Exceeds ANSI A118.4 shear bond specifications
- Acceptable for installing large ceramic and stone floor tile

**Available in:**  
- 50 lb. bag 33-0031-3111 Gray  
- 50 lb. bag 33-0032-3111 White

---

**Flex.4 Thin Set Mortar**  
**TA-452 / 453**

An entry-level mortar for applications over cementitious surfaces and other substrates.

- Meets ANSI A118.4 shear bond specifications

**Available in:**  
- 50 lb. bag 70-4956-3111 Gray  
- 50 lb. bag 70-4970-3111 White

---

**Full Contact Mortar**  
**TA-369**

TEC® Full Contact Mortar is a premium, full-contact, polymer-modified mortar used for bonding stone, granite, marble and tile 16” x 16” or larger to floors. Mixed with water, it exceeds ANSI A118.4 and ANSI A118.11 Specifications. For interior and exterior use.

- Eases installation of stone and large floor tile
- Extended open time
- Superior transfer – full coverage with minimum effort

**Available in:**  
- 50 lb. bag 70-7694-3111 White
Dry Set Mortars

Uncoupling Membrane Mortar
TA-337/338

A new Schluter®-Systems approved uncoupling membrane mortar! TEC® Uncoupling Membrane Mortar is a dry set, medium bed mortar made for use with Schluter®-DITRA uncoupling membrane and Schluter®-KERDI waterproofing membrane. TEC® Uncoupling Membrane Mortar provides installers with confidence by offering a formula that has been developed, tested and approved with Schluter®-DITRA and Schluter®-KERDI systems.

- Mixed with water, meets ANSI A118.1 Specifications
- Mixed with TEC® AcrylBond® AMA Acrylic Latex Mortar Additive, meets ANSI A118.4 and ANSI A118.11 specifications
- Medium bed mortar for use with large format tile
- Excellent for wall application
- Contributes to LEED® certification

Available in: Item Number:
50 lb. bag 70-0686-3111 Gray
50 lb. bag 70-0770-3111 White

* Available on the West Coast Only

Product contains zero VOC.
Ultimate Premixed Mortar

**TA-130**

TEC® Ultimate Premixed Mortar is a premium ready-to-use adhesive, excellent for setting ceramic, porcelain, natural stone, quarry and mosaic tile on interior floors and walls. Recommended for wall and floor applications with tile up to 20” x 20”. The white, non-staining formula is ideal for light-colored stone and grout. The lightweight composition offers easy troweling, non-slip wall performance, and non-slump floor performance. If mortar meeting ANSI A118.4 is required, TEC® Ultimate Premixed Mortar may be used for glass tile up to 8” x 8”.

- For tile and stone up to 20” x 20” on walls and floors
- Lightweight—non-slip performance on walls, non-slump on floors
- Exceeds ANSI A136.1 Type I & II Specifications
- Mold and mildew resistant
- Fast drying
- Creamy, easy to use formula

LONG LASTING, STRONG BONDS FOR FLOORS AND WALLS

TEC® offers ready-to-use, floor and wall mastic adhesives designed to meet the needs of a wide variety of projects. They provide strong, resilient bonds on many substrates including well-cured concrete, cementitious backer units, coated glass mat backer boards, exterior grade plywood, existing ceramic tile, gypsum wallboard and water resistant gypsum wallboard, cured portland cement plaster, masonry, plastic laminate and more.
Mastics

Double Duty™ Plus White Ceramic Tile Adhesive
TA-123
A premium ready-to-use white adhesive for installing marble and ceramic tile over interior walls and floors.
- Best for marble, natural stone and ceramic tile
- Recommended for floor applications with tile up to 8" x 8" and wall applications up to 20" x 20" with no slip
- Quick grab, no slip up to 7 pounds per square foot
- Bright white, non-staining formula is perfect for light colored stone and grout
- Strong, resilient bonds
- Exceeds ANSI A136.1, Type I and Type II Specifications

Available in: Item Number:
1 gallon pail 33-0721-5011 White
3.5 gallon pail 33-0721-1211 White

Double Duty™ Ceramic Tile Adhesive
TA-122
Ready-to-use adhesive for installing ceramic tile over interior walls and ceilings.
- Quick grab, non-sag formula
- Strong, resilient bonds
- Recommended for floor applications with tile up to 8" x 8" and wall applications up to 13" x 13"
- Great for installers who prefer slightly longer working times
- Exceeds ANSI A136.1, Type I and Type II Specifications

Available in: Item Number:
1 gallon pail 33-0007-5011 White
3.5 gallon pail 33-0007-1211 White

Ceramic Tile Adhesive
TA-101
Ready-to-use adhesive for installing ceramic tile over select wall, floor and countertop applications.
- Easy spread formula
- Resilient bonds
- Meets ANSI A136.1, Type I and Type II Specifications

Available in: Item Number:
1 gallon pail 33-0002-5011 White
3.5 gallon pail 33-0002-1211 White
When your project needs a high-performance grout, choose one of our advanced performance options. From crack, shrink and stain resistant grout to formulas that perform under diverse conditions, TEC® products offer advanced technology and performance.

- Premixed Grout
- Ultimate Performance Grout
- Epoxy Mortar and Grout
- Epoxy Grout Cleaner
- Silicone Sealant
Premixed Grout

InColor™ Advanced Performance Grout

TA-575

InColor™ Advanced Performance Grout is a ready-to-use product within the TEC® high-performance family of grouts. Its unique formulation requires no mixing, is easy to install, can be used for both interior and exterior tile installations and is made for residential or commercial use. InColor™ is easy to clean, mold and mildew resistant, color consistent, crack resistant, stain-proof*, chemical resistant and requires no sealing. This universal formula can be used for floors and walls for grouting joints 1/16” to 1/2” and is backed by a limited lifetime warranty**.

- Ready-to-use, no mixing
- Chemical resistant
- Stain-proof* with no sealing
- Easy clean-up
- Color consistent, no efflorescence
- Mold and mildew resistant
- For use in wet areas, including submerged applications
- Crack and shrink resistant
- Residential and commercial use
- Interior and exterior applications
- Available in 15 designer colors

Available in:

20 lb. pail (15 colors)

See page 34 for color options

* InColor™ grout is stain-proof against most common stains when cleaned immediately. See product data sheet for detailed information.

** Ask your sales associate or see tecspecialty.com for a copy of the limited lifetime warranty.
Design FX™ Grout

TA-546

Design FX™ grout is a ready-to-use grout that accentuates the natural beauty of glass, mosaic and metal tiles in addition to ceramic, porcelain and most natural stone tile. For use in tile joints from $\frac{1}{16}$" to $\frac{1}{2}$" on floors and $\frac{1}{8}$" to $\frac{1}{4}$" on walls. Design FX™ grout is stain-proof*, approved for interior and exterior use, can be immersed in water applications such as swimming pools and is rated up to moderate commercial use.

- Ready-to-use, no mixing
- Stain-proof* with no sealing
- Easy clean-up
- Color consistent, no efflorescence
- Mold and mildew resistant
- For use in wet areas, including submerged applications
- Crack and shrink resistant
- Residential use up to moderate commercial use
- Interior and exterior applications
- Available in crystal, silver and bronze

Available in:
$\frac{1}{2}$ gallon pail (3 colors)

See page 34 for color options

* Design FX™ grout is stain-proof to most common household, residential stains when cleaned immediately. See product data sheet for detailed information.
Ready To Use Grout

**TA-647**

TEC® Ready To Use Grout is a premium premixed grout that delivers highly durable, stain resistant grout joints. Unlike other premixed grouts, this unique, patented technology provides very high durability for residential use in intermittently wet as well as dry areas. It can also be used to grout over existing premixed or cementitious grout installations. TEC® Ready To Use Grout is formulated with very fine particles of sand and may be used in grout joints as small as $\frac{1}{48}''$.

- Grout joints from $\frac{1}{48}''$ to $\frac{1}{2}''$
- Highly stain resistant, never needs sealing
- Mold and mildew resistant
- Durable, wear resistant
- Water resistant, can use in showers
- Easy-to-use

**Available in:**

$\frac{1}{2}$ gallon pail (8 colors)

See page 34 for color options

**Virtua Flyers Skate Zone, Vorhees, NJ**

HydraFlex™ Waterproof Crack Isolation Membrane, 3N1™ Performance Mortar, Power Grout® Ultimate Performance Grout and AccuColor® Premium Sanded Grout.
Ultimate Performance Grout

Power Grout®
TA-550

TEC® Power Grout® is a breakthrough in grout technology. It maximizes performance while providing ease of use. Its unique formulation is highly stain resistant and provides strong, color consistent joints by resisting efflorescence, fading, cracking and shrinking. Power Grout® provides excellent performance in virtually any environment, including high traffic and wet conditions, and in residential and commercial applications. One universal formula for joints $\frac{1}{16}$" to $\frac{1}{2}$" wide.

- Highly stain resistant, never needs sealing
- Fast setting; open to traffic in 4 hours
- Color accurate and resistant to efflorescence
- Universal formula for wall and floor applications
- Crack and shrink resistant
- Mold and mildew resistant
- Exceeds ANSI A118.7 Specifications
- Residential to Extra Heavy Commercial Applications
- Interior/exterior use
- Zero VOC

Available in:
- 5 lb. jar (12 colors)
- 10 lb. bag (32 colors)
- 25 lb. bag (32 colors)

See page 34 for color options

Epoxy Mortar and Grout

**AccuColor EFX® Epoxy Special Effects Grout**

TA-440

AccuColor EFX® Epoxy Special Effects Grout provides superior performance and unmatched design possibilities in one easy-to-use product. Dual purpose 100% solids epoxy grout and mortar is designed for:

- Tile and stone installations on floors, walls and countertops
- Exceeds ANSI A118.3 Specifications in environments where high stain and chemical resistance is required
- Available in over 700 special order grout colors

ENSURE A FLAWLESS FINISH FOR YOUR NEXT TILE PROJECT

For projects that require cement grout, additives and caulk, TEC® offers solutions for virtually any environment, including high traffic and wet conditions. TEC® sanded grouts are polymer-enhanced portland cement grouts capable of providing color consistent joints from $\frac{1}{8}$" to $\frac{1}{2}$", and are intended primarily for floor tile applications, or for walls and countertops with wider joints. Sanded grout can be mixed with TEC® Acrylic Grout Additive in place of water to increase grout performance characteristics.

Consider TEC® AccuColor® Sanded Siliconized Acrylic Caulk when finishing an installation. It’s precisely color-matched to all shades of TEC® sanded grout for a flawless finish.
**Sanded Grout**

**AccuColor® Premium Sanded Grout**

**TA-650**

Polymer-enhanced portland cement grout formulated to provide highly wear-resistant, color consistent joints. Meets ANSI A118.6 Specifications for Commercial Cement Grout and ANSI A118.7 Specifications when used with TEC® Acrylic Grout Additive.

Available in:
- 9.75 lb. Pure Pak*
- 25 lb. bag
- 50 lb. bag

See page 34 for color options

**Adhesive and Grout**

**TA-691**

Formulated to set and grout ceramic tile on walls and floors. Best for small tile jobs or repairs.

For ceramic tile up to 8" x 8" with grouting joints 1⁄16" to 1⁄8". Mold and mildew resistant.

Available in:
- 1 quart pail 70-4798-5111 White
- 1 gallon pail 70-4798-5011 White

**Grout Additive**

**Acrylic Grout Additive**

**TA-869**

Acrylic latex admixture replaces water when grouting ceramic tile. For use with TEC® AccuColor® Sanded/Unsanded Grout. Makes joints less susceptible to water penetration (grouting wet areas) and increases grout flexibility. For exterior application in freeze/thaw exterior conditions.

Available in:
- 24 oz. bottle 33-1527-5611
- 64 oz. bottle 33-1527-5711

Available in:
- 1 gallon bottle 33-1527-5011
- 5 gallon pail 33-1527-1511

**Siliconized Caulk**

**AccuColor® Sanded Siliconized Acrylic Caulk**

**TA-850**

Available in:
- 10.5 oz. cartridge

THE RIGHT MIX OF PRODUCTS FOR DELICATE TILE SURFACES

TEC® offers unsanded grout options which are perfect for projects with delicate tile surfaces, such as marble, glass or other natural stones that could scratch with sanded grout. TEC® unsanded grouts are polymer-enhanced portland cement grouts designed for grouting small joints up to 1/8" and are primarily used inside walls, tub enclosures and countertops. Sanded grout can be mixed with TEC® Acrylic Grout Additive in place of water to increase grout performance characteristics.

Consider TEC® AccuColor® Unsanded Siliconized Acrylic Caulk when finishing an installation. It’s precisely color-matched to all shades of TEC® unsanded grout for a flawless finish.
Unsanded Grout

AccuColor® Premium Unsanded Grout
TA-620
Polymer-enhanced portland cement grout formulated to provide highly wear-resistant, color consistent joints. Meets ANSI A118.6 Specifications for Commercial Cement Grout and ANSI A118.7 Specifications when used with TEC® Acrylic Grout Additive.

Available in:
- 9.75 lb. Pure Pak*
- 25 lb. bag
- 50 lb. bag

Adhesive and Grout
TA-631
Formulated to set and grout ceramic tile on walls and floors. Best for small tile jobs or repairs. For ceramic tile up to 8" x 8" with grouting joints 1/16" to 1/8". Mold and mildew resistant.

Available in: Item Number:
- 1 quart pail 70-4794-5111 White

Grout Additive

## TEC® Reference Guide for Limited System Warranties

The following serves only as a reference guide to the limited system warranties that cover TEC® tile and stone installation systems. Ask your sales associate or see tecspecialty.com for limited warranty documents that cover your installation. Refer to limitations and guidelines expressed on the full documents.

Note: N/A indicates Not Applicable.

*Options vary depending on system and application.*
Description of Limited Warranty Coverage

Bond – The mortar will maintain the bond between the tile and approved substrate (as listed on Product Data Sheets) for the period specified in the limited warranty, subject to limitations and exclusions.

Crack Isolation (tile) – The System will not transfer cracks from the approved substrate (as listed on Product Data Sheets) through the tile or stone and will maintain the bond between the tile or stone and substrate, when subjected to in-plane movement of cracks up to a ¼" or ⅛", as specified by the System (see table on previous page), subject to the limited warranty requirements, limitations and exclusions.

Crack Isolation (grout) – The System will not transfer cracks from the approved substrate (as listed on Product Data Sheets) through Power Grout® or AccuColor EFX® grout, when subjected to in-plane movement of cracks up to a ¼" or ⅛", as specified by the System (see table on previous page), subject to the limited warranty requirements, limitations and exclusions.

Waterproof – When used with HydraFlex™ membrane, the System (see table on previous page) will prevent positive side (surface) liquid water migration through the membrane to the approved substrate (as listed on the Product Data Sheets).

Description of Remedy and Claim Procedure

H.B. Fuller Construction Products Inc. (“HBF-CP”) will, at its option and expense, for each warranty claim that it determines to be valid, supply the Owner with labor and materials necessary to repair or replace, merely one time, the portion of the installation which HBF-CP has determined needs repair or replacement due to defective Products or System, or replace or refund the amount Owner paid for the defective Product or System. HBF-CP may remedy grout cracking resulting from repetitive dynamic substrate cracking or movement with a sealant in lieu of grout and the foregoing warranty does not cover such sealant.

The duration of the warranty on any replacement Product and/or System will not exceed the balance of the warranty remaining on the Product and/or System that was replaced as of the date of such replacement.

In order to qualify for the remedies described above, the Owner must notify HBF-CP, in writing, before the expiration of the warranty period described above and provide proof of purchase of the Product or System which is alleged to be defective, regarding the discovery of the alleged defect in the Product or System covered by the foregoing warranty. Owner must provide HBF-CP a reasonable opportunity to review and investigate the alleged defect. Owner must send or fax written claims to:

H.B. Fuller Construction Products Inc.
1105 South Frontenac Street
Aurora, IL 60504-6451
Attn: Technical Support
Fax: 630-952-1235

Note: This document is not meant to serve as a limited warranty for a TEC® tile and stone installation System, but is meant to point out some of the differences among the limited warranties that include TEC® products and Systems. For complete limited warranty details and to obtain a TEC® Limited System Warranty document for your project, go to tecspecialty.com.

1 For the installation of green marble and other moisture sensitive agglomerates that require a 100% solids epoxy, Super Flex™ may be substituted with AccuColor EFX® Epoxy Grout and Mortar.

2 Existing substrate cracks cannot exhibit in-plane differences beyond ⅛" or ¼" width, as specified by the System.

* H.B. Fuller Construction Products Inc. (“HBF-CP”) warrants to the original owner that TEC® Power Grout® (“Product”) will provide color uniformity (free from efflorescence and color fading), will be free from manufacturing defects and will not break down or deteriorate under normal use (effective from the date of installation). This limited warranty does not cover efflorescence caused by hydrostatic pressure or moisture vapor emissions, general wear and tear of the grout and does not eliminate the need for routine maintenance and cleaning of the grout. This limited warranty is non-transferable.

1-800-TEC-9023 TECHNICAL SERVICE
H.B. Fuller Construction Products
(a subsidiary of H.B. Fuller Company) is a leading provider of technologically advanced construction materials and solutions to the commercial, industrial and residential construction industry.

The company’s recognized and trusted brands – TEC®, CHAPCO®, Grout Boost®, Foster®, AIM™ and others – are available through an extensive network of distributors and dealers, as well as home improvement retailers.
